Specialised health risk assessment for workplaces (by employers and self-employed persons)

Extract from Government publication

Purpose

This guide is to be used by employers or self-employed persons to assess the potential risk of exposure to SARS-CoV-2 virus and control measures at all workplaces. (SARS-CoV-2 virus is the causative virus of Covid-19).

Objectives

- i) To identify and assess the potential risk of exposure to SARS-CoV-2 virus at workplaces
- ii) To identify control measures (or the absence of control measures) and assess their effectiveness to reduce the risk of transmission of SARS-CoV-2 virus from recognised and unrecognised sources of infection in a workplace
- iii) To inform the employer of the risk of potential exposure to SARS-CoV-2 virus and additional controls that might be required.

This guide serves as a departure point for employers, self-employed persons and appropriately qualified persons to guide their COVID-19 Risk Assessments. This content must not be regarded as the absolute content of a Risk Assessment, rather it is the minimum requirements.

In light of the Abovementioned IQM is making its services available to all Firms in all Business Sectors to assist in achieving the Government's Risk-adjusted strategy for economic activity.

Our Team of Expert Consultants are standing by to assist you.

We will assist your company to comply by conducting the following:

- Conduct a GAP analysis at client's premises on current systems and physical conditions to determine the scope of work to be conducted and to quote realistically for services to be rendered.
- Draft a Risk Assessment in line with Governments Specialised health risk assessment for workplaces (by employers and self-employed persons) guideline and the Risk-adjusted strategy for economic activity.
- Draft a site specific Safe Operating Procedure/Safety Plan for the client in line with the abovementioned Governmental requirements.
- Train all client's employees and management on the adverse effects, precautionary measures and Governmental requirements of COVID 19.
- Supply client with training attendance register and Certificates as proof of training.
- Advise client on OHS Act requirements pertaining to the current conditions and offer a service to assist with compliance.
- Conduct follow-ups and advise client when new Governmental requirements are made available.
- Assist client with sourcing of quality PPE, sanitizers, dispensers and other consumables.
